CRAFTING LOW-SUGAR INDULGENCE

At Shafi Gluco Chem, we have always been driven by a steadfast commitment to pioneering the frontiers of nutrition and innovation. Our relentless pursuit of excellence has led us to the creation of our latest marvel: the TapiLow Syrup, a remarkable range of Low Sugar Tapioca Syrup that is poised to redefine the very essence of low-sugar culinary experiences.

TapiLow isn't just another syrup; it's a paradigm shift in how we approach sweetness. It represents the culmination of years of research and innovation, all aimed at delivering a product that not only satisfies your customer's cravings but also helps your product stand out from others. It offers reduced sugar content from other sweeteners up to 70% without compromising on taste or functionality. We understand that the pursuit of a healthier lifestyle should never come at the cost of flavor, and TapiLow is our answer to that challenge.

**All Syrups are available in Organic & Conventional grades
Fructose free syrup
